Volume XXVII

JULY 1956

Number 1

Summary

Crime Trends, January-June, 1956

U. S. major crimes rose 14.4 percent as a result of a 14 percent increase in urban crimes and a 14.6 percent increase in rural crimes in the first 6 months of 1956 as compared with the same period in 1955. This is a sharp reversal of the slight downward trend in 1955. Percentage changes for the estimated total U. S. crimes and for crimes reported by urban and rural police agencies are as follows:

Crime	United States	Urban	Rural
TOTAL	+14.4	+14.0	+14.6
Murder	+4.0	+6.5	- .5
Negligent manslaughter	+10.2	+8.0	+12.8
Rape	+6.8	+13.3	-1.6
Robbery	-1.1	-.8	-2.2
Aggravated assault	+2.8	+1.4	+8.3
Burglary	+4.7	+3.5	+7.5
Larceny	+18.5	+18.1	+22.7
Auto theft	+22.3	+27.1	+12.7

Police Employees

Police employees killed in line of duty in the year 1955 numbered 55 in 3,732 cities, or a rate of 3.2 as compared with 3.5 in 1954 (rate per 5 million inhabitants).

Of the 172,069 police employees in 3,732 cities as of April 30, 1956, 10 percent were civilians. There were 2 police employees per 1,000 inhabitants in the reporting cities.

Offenses Cleared by Arrest and Persons Convicted, 1955

For each 100 major crimes in 1955, city police cleared by arrest 28 and charged 20 persons, 14 of whom were found guilty.

Figure 1.

Crime Trends

Major Crime Totals, January-June, 1955-56

A sharp increase of 14.4 percent, a 10-year high, brought the 1956 midyear major crime count to 1,291,120. This is 21.9 percent above the previous 5-year average and 34.4 percent above the 1951 figure, the first of the midyear U. S. estimates.

Urban and rural crimes increased about the same, city crimes up 14 percent and rural crimes up 14.6 percent. The last increases of similar proportions occurred in 1946 when, at the half-year mark, city crimes showed an increase of 13 percent and rural crimes had risen 19.6 percent. However, the extreme increases during the first 6 months of 1946 halted during the last half of that year, and if some similar reversal is not experienced in 1956, crime totals by the year's end will reach the 2½ million mark for the first time.

In 1955, crime totals remained at almost a standstill, down 0.2 percent from 1954, the first really favorable picture in 8 years. But any encouragement found in the trends of last year was rudely shaken by the abrupt rise the first half of 1956.

All major crime classes except robbery showed increases by the 1956 midyear point and these ranged from 2.8 percent for aggravated assaults up to 22.3 percent for auto thefts. Robbery, the only class to register any decrease, declined 1.1 percent. The percentage changes for other crimes, all increases, are: aggravated assault, 2.8; murder, 4; burglary, 4.7; rape, 6.8; negligent manslaughter, 10.2; larceny, 18.5; and auto theft, 22.3.

A comparison of the estimated crimes and the percentage changes for the period January-June in 1955 and 1956 appears in table 1. The estimates are based on usable crime reports received from areas representing about four-fifths of the Nation's population.

Table 1.—Crime Trends, Urban and Rural

[Estimated number of major crimes in the United States, January-June, 1955-56]

Offense	Number of offenses January-June		Change	
	1955	1956	Number	Percent
TOTAL	1,128,350	1,291,120	+162,770	+14.4
Murder and nonnegligent manslaughter.....	3,290	3,420	+130	+4.0
Manslaughter by negligence.....	2,950	3,250	+300	+10.2
Rape.....	9,300	9,930	+630	+6.8
Robbery.....	30,260	29,940	-320	-1.1
Aggravated assault.....	46,110	47,410	+1,300	+2.8
Burglary, breaking or entering.....	254,330	266,200	+11,870	+4.7
Larceny, theft.....	672,280	796,650	+124,370	+18.5
Auto theft.....	109,830	134,320	+24,490	+22.3

Crime Trends, Urban-Rural, January-June, 1955-56

The 14.4 percent rise in U. S. crime was felt about equally in urban and rural areas. Urban places reported a 14 percent increase while rural areas reported a 14.6 percent increase for the first 6 months of 1956, as compared with the same period in the previous year.

The direction of the trend in the individual crime classes for city crimes and rural crimes was almost uniform although the trends in murders and rapes were not in agreement in the two areas. Those two crimes increased in cities but decreased in rural areas.

Increases in urban crimes, stated as percentages, were as follows: murder, 6.5; negligent manslaughter, 8; rape, 13.3; aggravated assault, 1.4; burglary, 3.5; larceny, 18.1; and auto theft 27.1. The only urban crime to decrease was robbery, down 0.8 percent.

Rural crimes that increased, with percentage increases, were as follows: negligent manslaughter, 12.8; aggravated assault, 8.3; burglary, 7.5; larceny, 22.7; and auto theft, 12.7. Decreases occurred in rural crimes in three classes: murder, down 0.5 percent; rape, down 1.6 percent; and robbery down 2.2 percent.

The details are shown in tables 2 and 3. Trends are based on reports from identical areas for both periods.

Table 2.—Urban Crime Trends, January-June, 1955-56

[Offenses known to the police in 2,496 cities, total population 78,149,787 based on 1950 decennial census]

Offense	Number of offenses January-June		Change	
	1955	1956	Number	Percent
Total	705, 804	804, 183	+98, 379	+14. 0
Murder and nonnegligent manslaughter.....	1, 727	1, 839	+112	+6. 5
Manslaughter by negligence.....	1, 177	1, 271	+94	+8. 0
Rape.....	5, 051	5, 722	+671	+13. 3
Robbery.....	24, 301	24, 106	-193	-. 8
Aggravated assault.....	32, 864	33, 311	+447	+1. 4
Burglary—breaking or entering.....	170, 681	176, 661	+5, 980	+3. 5
Larceny—theft.....	398, 441	470, 556	+72, 115	+18. 1
Auto theft.....	71, 362	90, 715	+19, 353	+27. 1

Table 3.—Rural Crime Trends, January-June, 1955-56

[Based on reports of 1,458 sheriffs, 149 rural village officers, and 10 State police; total rural population, 37,811,192 based on the 1950 decennial census]

Offense	Number of offenses January-June		Change	
	1955	1956	Number	Percent
Total	128, 904	147, 776	+18, 872	+14. 6
Murder and nonnegligent manslaughter.....	864	800	-64	-7. 4
Manslaughter by negligence.....	921	1, 039	+118	+12. 8
Rape.....	2, 429	2, 389	-40	-1. 6
Robbery.....	3, 120	3, 051	-69	-2. 2
Aggravated assault.....	6, 471	7, 007	+536	+8. 3
Burglary—breaking or entering.....	44, 254	47, 569	+3, 315	+7. 5
Larceny—theft.....	59, 992	73, 635	+13, 643	+22. 7
Auto theft.....	10, 853	12, 226	+1, 373	+12. 7

Crime Rates

Urban Crime Rates, January-June, 1956

Crime rates presented here are for the first half of 1956. They are of necessity based on the latest decennial census (1950) due to the absence of later estimates for individual areas, as has been explained in some detail in previous issues of these bulletins.

Increases in population cause such rates to be overstated while decreases in population have the opposite effect. When greater preciseness is warranted, the rates may be adjusted on the basis of the user's population projections along the lines explained on page 91 of the 1955 annual issue of these reports (vol. XXVI, No. 2).

In tables 4 and 6, it can be observed generally that crime occurs with greater frequency per unit of population as the cities increase in size.

The variations in crime rates among the States and geographic divisions, shown in table 5, should be noted in conjunction with the numerous factors that affect the amount of crime in an area. These are identified, in part, on page 12.

Table 4.—Urban Crime Rates, January–June, 1956, by Population Groups

[Offenses known to the police and rate per 100,000 inhabitants. Population figures based on 1950 decennial census]

Population group	Criminal homicide		Rape	Robbery	Aggravated assault	Burglary, breaking or entering	Larceny, theft	Auto theft
	Murder, nonnegligent manslaughter	Manslaughter by negligence						
TOTAL, GROUPS I-VI								
2,653 cities; total population, 80,364,683:

Rural Crime Rates, January-June, 1956

Less people, less crime, is the picture shown by city crime rates. As cities decrease in size, so do the crime rates, but this general observation is not consistently true.

The most serious of major crimes occur with greater frequency in rural areas than in the smallest cities (Group VI—2,500 to 10,000 inhabitants). Criminal homicide and rape rates in rural areas are about double those in the smallest cities, and the rates for robbery and aggravated assault are slightly higher in the rural areas than in the smallest city group. In other crime classes the rural rates are lower.

"Rural" under this program refers to all areas outside incorporated places having at least 2,500 inhabitants. Certain portions of some rural areas are now highly urbanized, such as the "urbanized fringe" areas around cities. Contributing law enforcement agencies report crimes that occur in their police jurisdictions. Thus, crimes that happen in an urbanized fringe located in an area that is otherwise rural are reported by the county sheriff.

Crime rates for rural areas in table 8 are based on the number of crimes in the same table as reported by 1,766 law enforcement agencies representing about 66 percent of the rural population.

Table 8.—Rural Crime Rates, January-June, 1956

(Offenses known and rate per 100,000 inhabitants, as reported by 1,594 sheriffs, 162 rural village officers, and 10 State police; total rural population 40,453,233 based on 1950 decennial census)

Offense	Offenses known	
	Number	Rate
Murder and nonnegligent manslaughter.....	931	2.3
Manslaughter by negligence.....	1,097	2.7
Rape.....	2,546	6.3
Robbery.....	3,288	8.1
Aggravated assault.....	7,560	18.7
Burglary—breaking or entering.....	49,822	123.2
Larceny—theft.....	76,975	190.3
Auto theft.....	12,788	31.6

Offenses in Individual Areas

Offenses in Individual Cities With More Than 25,000 Inhabitants

The number of offenses reported as having been committed during the period of January-June, 1956, is shown in table 9. The compilation includes the reports received from police departments in cities with more than 25,000 inhabitants. Police administrators and other interested individuals will probably find it desirable to compare the crime rates of their cities with the average rates shown in tables 4, 5, and 6 of this publication. Similarly, they will doubtless desire to make comparisons with the figures for their communities for prior periods, in order to determine whether there has been an increase or a decrease in the amount of crime committed.

Caution should be exercised in comparing crime data for individual cities because the differences in the figures may be due to a variety of factors. Such comparisons are not necessarily significant even though the figures for individual communities are converted into terms of number of offenses per 100,000 inhabitants.

The following is a list of some of the factors which affect the amount of crime in the community:

- Population of the city and metropolitan area adjacent thereto.
- The composition of the population with reference particularly to age, sex, and race.
- The economic status and activities of the population.
- Climate.
- Educational, recreational, and religious facilities.
- The number of police employees per unit of population.
- The standards governing appointments to the police force.
- The policies of the prosecuting officials and the courts.
- The attitude of the public toward law-enforcement problems.
- The degree of efficiency of the local law-enforcement agency.

The figures presented in the following tabulation are those reported by the individual police departments in the cities represented without reducing the data to crime rates (number of offenses per 100,000 inhabitants).

In considering the volume of crime committed locally, it is generally more important to determine whether the figures for a given community show increases or decreases rather than to ascertain whether they exceed or fall short of those for some other individual community, and it should be remembered that the amount of crime committed in a community is not solely chargeable to the police but is rather a charge against the entire community.

In publishing these figures the FBI acts as a service agency. The figures published are those submitted by the contributing agencies.

¹ Larcenies not separately reported. Figure listed includes both major and minor larcenies.² The crime reporting for the city indicated does not meet acceptable standards established by the Committee on Uniform Crime Records of the International Association of Chiefs of Police.

Police Employee Data

Police Killed, 1955

Police in 3,732 cities reported that 55 employees were killed in line of duty during the calendar year 1955. The figure 55 does not represent all cities in the country but is limited to the area indicated in tables 10-12.

A comparison of the rate per unit of population in table 10 with that for 1954 indicates a slight decrease in 1955 in the number of police who lost their lives in line of duty by acts of criminals, traffic accidents, and the like.

By measuring the 55 deaths in line of duty against the total police employees in the reporting cities (table 11), 1 death for every 3,129 police employees is indicated. Similar figures in 1954 disclosed 1 death for every 2,752 police employees.

In table 10, the data are presented by geographic location and by city groups. Table 12 reflects a listing of the number of reporting cities and the population represented (1950 census figures).

Number of Police Employees, April 30, 1956

The number of police per unit of population is only one of numerous factors for consideration in an attempted study of the amount of crime in a particular area. Preoccupation as to the numerical strength of a police department leads to oversimplification of a highly complex problem. Selection, training, pay, retirement provisions, and quality of supervision are only some of the other items that must be considered.

A portion of the police strength is never on duty in the streets and thus is never apparent to the public. The effectiveness of the police in the streets is dependent to a large extent on an unseen headquarters corps. Police administrators have continued to improve their street coverage by obtaining civilian personnel to release police officers from the increasingly important and technical work at headquarters. They have had to overcome a historical conception that a police employee can only be a uniformed officer. This has made difficult the employment of civilians more properly qualified, in some instances, than uniformed officers for some inside duties.

The 10 percent of police personnel who are civilians in 1956 represent a point on a steady curve indicating a continued rise in the employment of civilians by police organizations. The growth in the employment of civilians has been gradual and steady. For example, the percentage in 1950 was 7.5.

Table 11 shows a geographic distribution by city groups of the 172,069 police employees reported as of April 30, 1956, by 3,732 city police departments. The number of police employees per 1,000 inhabitants is also listed. These departments represent almost 97 percent of the city population in this country.

School-crossing guards, as well as other part-time employees, are included in the published numerical police strength. However, such part-time employees are represented in the figures only to the extent that they equalled the hours of work of full-time employees. Some agencies report school guards as civilians while others state that they are police officers.

Here is a list of the percentage of civilian employees by city groups:

<i>Police Employee Data, 1956</i>		<i>Per- centage civilian em- ployees</i>

Police Employees in Individual Cities

Tables 13 and 14 list police strength by cities. Civilian employees are reported separately for cities over 25,000.

School-crossing guards paid from police funds are counted in the police strength of a city, as are other part-time employees. However, the total hours worked by part-time employees, such as school guards, and not the number of such employees are considered in presenting figures for those who work less than a full-time week. For example, 5 school guards whose total time equals that of 2.6 regular officers are counted as 2 employees rather than as 5. Fractions of less than 0.75 are ignored in the conversion.

Those cities reporting school guards as well as any part-time employees and whose published strength includes a conversion to a full-time equivalent are marked by a footnote in the tables.

Auxiliary police, merchant police, night watchmen, schoolboy patrols, and other persons who are not paid or who receive their pay from sources other than police funds are not included in tables 13 and 14.

The possible differences in the length of the workweek in cities should be considered in any attempted comparison of the figures for two or more cities.

¹ The figures for the cities indicated include school-crossing guards and other part-time employees expressed in terms of full-time personnel. See comments on page 25.

Offenses Cleared and Persons Arrested

Here are shown the number of (1) crimes, (2) crimes cleared by arrest, and (3) persons charged for such crimes. The data are for the latest calendar year (1955). Comparison of the 3 factors is possible for only the Part I classes of offenses (crimes). These 7 classes are: criminal homicide, rape, robbery, aggravated assault, burglary, larceny, and auto theft. They are defined briefly on page 65.

For other classifications, the program does not provide for a tally by police of anything other than arrest data. This means that the number of crimes or violations and clearances by arrest of such infractions are not compiled for the Part II classes defined on pages 65 and 66.

Offenses Cleared by Arrest, 1955

City police cleared by arrest a larger proportion of crimes in 1955 than in any of the preceding 5 years. They cleared by arrest 2 of each 7 crimes (28.4 percent). The usual high clearance rate for crimes against the person and relatively low clearance rate for crimes against property are present in the 1955 data.

Crimes Against the Person. Police cleared 78.5 percent of these by arrest in 1955. Individually, the percentage clearances of these crimes were: murder, 92.7; manslaughter by negligence, 85.1; rape, 78.6; and aggravated assault, 77.4. Such crimes constituted 5.8 percent of the Part I (major) crimes but with the high clearance rates in these categories accounted for 15.9 percent of all offenses cleared.

Crimes Against Property. These made up 94.2 percent of the crimes reported. The 25.4 percent of property crimes cleared by arrest represented 84.1 percent of all Part I crimes cleared by the 1,771 cities represented in tables 15 and 16.

Robberies, similar to crimes against the person in that the victim is in personal contact with the criminal, had the highest property crime clearance rate in 1955, 42.8 percent. Of the other property crimes, police cleared by arrest 32.1 percent of the burglaries, 29.2 percent of the auto thefts, and 21.0 percent of other thefts.

The arrest of one person may clear several crimes and conversely a number of persons may be involved in only one crime.

The above data are from 1,771 cities with a combined population of over 66 million as shown in tables 15, 16, 17, and 19.

Figure 3.

Table 15.—Offenses Known, Cleared by Arrest, and Persons Charged (Held for Prosecution), 1955, by Population Groups, Number Per 100 Known Offenses

[Population figures from 1950 decennial census]

¹ Includes the District of Columbia.

Persons Charged, 1955

Police in 1,771 cities reported that they arrested over 2.9 million persons in 1955 who were charged with some violation other than traffic. The violations involved ranged from minor regulatory matters through criminal homicide. The 2.9 million persons do not include those persons who were arrested but released without the filing of a charge by police.

For all reporting cities combined, the 2.9 million persons charged figure indicates that on the average 1 person in 22 in the city population of 66,012,729 was arrested and charged in 1955. Stated another way, there were almost 4,462 persons charged for every 100,000 city inhabitants.

With cities grouped by size, it may be observed generally that the larger the population center the higher the arrest rate. However, the group with the biggest cities, over 250,000, did not have the highest rate. The high was in the second largest city group, 100,000 to 250,000 inhabitants.

In the 24 crime classifications in table 17, the Group II cities were high in 12, or one-half, while the biggest city group, I, was high in only 10 classes. Together, these cities over 100,000 were high in 22 classifications.

The rate for persons arrested and charged for offenses against the family and children in the Group III cities (50,000 to 100,000) was the high for all city groups. The only other high not reflected in the Groups I and II figures is that for driving while intoxicated. The high rate for arresting and charging for that violation occurred in the smallest cities, Group VI (under 10,000). For this same violation, the lowest rate occurred in the largest city group, I.

Police count only one person charged for each arrest. This is true even though it is not uncommon for a number of charges to be filed against one person. For example, if a person is arrested for one offense of burglary and is charged with burglary and also with a count of larceny (a part of the burglary), only one person charged is counted. Similarly, if a person is arrested and charged for 3 separate offenses of auto theft, only 1 person would be tallied as charged.

Table 17.—Persons Charged (Held for Prosecution), 1955, all Offenses Except Traffic, Number and Rate Per 100,000 Inhabitants, by Population Groups

[Population figures from 1950 decennial census]

Figure 5.

Persons Found Guilty, 1955

Five persons were found guilty in 1955 for every 7 who were arrested and charged by police.

These data are from reports of 206 cities over 25,000 population (tables 20 and 21) and the offenses known information may be studied in relation to persons charged and found guilty for Part I offense classes (table 20).

For every 100 major offenses known to the police in 1955, 28 were cleared by arrest, 20 persons were charged and 14 persons were found guilty, according to table 20. Every other murder and every third negligent manslaughter resulted in a conviction in 1955. Robberies and aggravated assaults occurred at the rate of 4 for each person convicted for these crimes.

The ratio of offenses to convictions is much lower for burglary, auto theft and larcenies. There were 7 burglaries and auto thefts for each conviction while only 1 larceny conviction was attained for every 9 reported offenses of that type.

The high and the low in conviction rates for all crime classes are found in the same categories as in the past several years. Convictions of persons charged with driving while intoxicated reached 87.3 percent of those charged in that classification. That was the highest percentage of persons found guilty in a single classification in the 206 cities studied. Negligent manslaughters, principally traffic deaths where some person other than the victim is responsible due to gross negligence, had the lowest percentage of convictions in 1955 as in previous years. Only 47.4 percent of those persons charged with negligent killings were found guilty of any charge.

Convictions are reported on the basis of the final disposition of prosecutions and not on the findings in preliminary or other interim court procedures.

Persons Released—Not Held For Prosecution, 1955

Not all arrests reported by police for 1955 are represented in tables 15-21. Those tables represent persons arrested and formally charged. Persons arrested who are released by the police before a formal charge is filed are reported separately. Tables 22 and 23 reflect the "released" data but do not include persons who are charged and who are not "found guilty."

"Released" data relates to arrests by the reporting agencies for violations that occurred within their jurisdictions. Arrests made for "other authorities" or "outside authorities" for violations occurring elsewhere are not counted in the persons released information compiled by the arresting agency.

Table 22.—Persons released without being held for prosecution, 1955; all offenses except traffic, number and rate per 100,000 inhabitants, by population groups—Continued

Offense charged	TOTAL	Group I	Group II	Group III	Group IV	Group V	Group VI
	896 cities; total population, 35,059,842	24 cities over 250,000; population, 15,987,803	25 cities, 100,000 to 250,000; population, 3,332,680	66 cities, 50,000 to 100,000; population, 4,720,038	120 cities, 25,000 to 50,000; population, 4,249,828	289 cities, 10,000 to 25,000; population, 4,385,278	372 cities under 10,000; population, 2,184,215
Driving while intoxicated:							
Number of persons released	1,318	64	328	89	181	250	406
Rate per 100,000	3.8	.4	9.3	1.9	4.3	5.7	18.6
Disorderly conduct:							
Number of persons released	10,670	2,559	1,321	981	1,643	2,467	1,699
Rate per 100,000	30.4	16.0	37.4	20.8	38.7	56.3	77.8
Drunkenness:							
Number of persons released	63,934	15,763	27,486	4,635	2,565	4,185	9,300
Rate per 100,000	182.4	98.6	778.0	98.2	60.4	95.4	425.8
Vagrancy:							
Number of persons released	5,433	359	1,000	378	528	1,173	1,995
Rate per 100,000	15.5	2.2	28.3	8.0	12.4	26.7	91.3
Gambling:							
Number of persons released	2,514	2,107	205	23	35	88	56
Rate per 100,000	7.2	13.2	5.8	.5	.8	2.0	2.6
Suspicion:							
Number of persons released	91,059	60,122	3,277	7,657	6,997	8,122	4,883
Rate per 100,000	259.7	376.0	92.8	162.2	164.6	185.2	223.6
All other offenses:							
Number of persons released	22,968	6,731	2,505	1,606	4,301	4,768	3,057
Rate per 100,000	65.5	42.1	70.9	34.0	101.2	108.7	140.0

Table 23.—Persons Released Without Being Held for Prosecution, Traffic Violations, Except Driving While Intoxicated, 1955; Number and Rate Per 100,000 Inhabitants, by Population Groups

[Population figures from 1950 decennial census]

Offense charged	Total	Group I	Group II	Group III	Group IV	Group V	Group VI
	611 cities; total population, 22,413,731	16 cities over 250,000; population, 10,122,745	15 cities, 100,000 to 250,000; population, 2,113,823	40 cities, 50,000 to 100,000; population, 2,872,241	78 cities, 25,000 to 50,000; population, 2,786,856	194 cities, 10,000 to 25,000; population, 2,919,145	266 cities under 10,000; population, 1,598,921
Road and driving laws:							
Number of persons released	117,010	25,591	7,102	7,101	36,526	17,673	23,017
Rate per 100,000	522.0	252.8	336.0	247.2	1,310.7	605.4	1,439.5
Parking violations:							
Number of persons released	899,318	176,936	64,457	123,524	190,215	242,478	101,708
Rate per 100,000	4,012.4	1,747.9	3,049.3	4,300.6	6,825.4	8,306.5	6,361.0
Other traffic and motor vehicle laws:							
Number of persons released	90,615	25,576	7,041	2,343	8,335	9,124	8,196
Rate per 100,000	370.4	252.7	333.1	81.6	299.1	312.6	512.6

Classification of Offenses

Uniform Crime Reporting Program

Readers not entirely familiar with the uniform crime reporting program may be interested in a brief explanation of the contents of crime reports included in this bulletin:

1. These crime figures are called "police statistics" to distinguish them from judicial or penal statistics in the criminal field. (Program is voluntary. International Association of Chiefs of Police started it January 1930. The FBI has acted as the central clearinghouse since September 1930, by an Act of Congress.)

2. Crimes that are exclusively Federal are not included.

3. Each reporting agency counts only those crimes or arrests for crimes committed in its jurisdiction. A sheriff reports only for his rural areas outside the city or town limits of any urban places in his county. This feature avoids duplication.

4. "Offenses known to the police" (the Part I offenses below) are limited to seven classes of grave offenses shown by experience to be those most generally and completely reported to the police.

5. Offenses (crimes) for the Part I classes are reported as they become known. The police may learn of the occurrence of crime in a number of ways: reports of police officers; citizens' complaints; notification from prosecuting or court officials; or otherwise.

6. Offenses are included without regard to: (a) age of the offender; (b) value of property involved; (c) recovery of stolen property; (d) arrests; or (e) prosecutive action. The purpose is to show the amount of crime that has occurred as distinguished from arrests and the classifying is based strictly on the facts in possession of the police.

7. Complaints that are found by police investigation to be groundless are not included in crime tables in this bulletin, and returns that appear incomplete or defective are excluded.

8. Arrests are not included in "offenses known" information but arrest data are collected separately for the entire crime classification, Parts I and II. So, the only information for Part II offenses is that based on arrests.

In publishing the data sent in by chiefs of police in different cities, the FBI does not vouch for their accuracy. They are given out as current information which may throw some light on problems of crime and criminal-law enforcement.

The complete classification of crimes is shown below with brief definitions for each:

Part I Offenses

1. *Criminal homicide*.—(a) Murder and nonnegligent manslaughter includes all wilful felonious homicides as distinguished from deaths caused by negligence. Does not include attempts to kill, assaults to kill, suicides, accidental deaths, or justifiable homicides. Justifiable homicides excluded from this classification are limited to the following types of cases: (1) The killing of a felon by a peace officer in line of duty; (2) the killing of a holdup man by a private citizen. (b) Manslaughter by negligence includes any death which the police investigation establishes was primarily attributable to gross negligence on the part of some individual other than the victim.

2. *Rape*.—Includes forcible rape, statutory rape (no force used—victim under age of consent), assault to rape, and attempted rape.

3. *Robbery*.—Includes stealing or taking anything of value from the person by force or violence or by putting in fear, such as strong-arm robbery, stickups, robbery armed. Includes assault to rob and attempt to rob.

4. *Aggravated assault*.—Includes assault with intent to kill; assault by shooting, cutting, stabbing, maiming, poisoning, scalding, or by the use of acids. Does not include simple assault, assault and battery, fighting, etc.

5. *Burglary—breaking or entering*.—Includes burglary, housebreaking, safecracking, or any unlawful entry to commit a felony or a theft, even though no force was used to gain entrance. Includes attempts. Burglary followed by larceny is included in this classification and not counted again as larceny.

6. *Larceny—thief* (except auto theft).—(a) Fifty dollars and over in value; (b) under \$50 in value—includes in one of the above subclassifications, depending upon the value of the property stolen, thefts of bicycles, automobile accessories, shoplifting, pocket picking, or any stealing of property or article of value which is not taken by force and violence or by fraud. Does not include embezzlement, "con" games, forgery, worthless checks, etc.

7. *Auto theft*.—Includes all cases where a motor vehicle is stolen or driven away and abandoned, including the so-called joy-riding thefts. Does not include taking for temporary use when actually returned by the taker, or unauthorized use by those having lawful access to the vehicle.

Part II Offenses

8. *Other assaults*.—Includes all assaults and attempted assaults which are not of an aggravated nature and which do not belong in class 4.

9. *Forgery and counterfeiting*.—Includes offenses dealing with the making, altering, uttering, or possessing, with intent to defraud, anything false which is made to appear true. Includes attempts.

10. *Embezzlement and fraud*.—Includes all offenses of fraudulent conversion, embezzlement, and obtaining money or property by false pretenses.

11. *Stolen property; buying, receiving, possessing*.—Includes buying, receiving, and possessing stolen property as well as attempts to commit any of those offenses.

12. *Weapons; carrying, possessing, etc.*—Includes all violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers and all attempts to violate such statutes or regulations.

13. *Prostitution and commercialized vice*.—Includes sex offenses of a commercialized nature, or attempts to commit the same, such as prostitution, keeping bawdy house, procuring, transporting, or detaining women for immoral purposes.

14. *Sex offenses* (except rape and prostitution and commercialized vice).—Includes offenses against chastity, common decency, morals, and alike. Includes attempts.

15. *Offenses against the family and children*.—Includes offenses of neglect, desertion, or abuse of family and children.

16. *Narcotic drug laws*.—Includes offenses relating to narcotic drugs, such as unlawful possession, sale, or use. Excludes Federal offenses.

17. *Liquor laws*.—With the exception of "drunkenness" (class 18) and "driving while intoxicated" (class 22), liquor law violations, State or local, are placed in this class. Excludes Federal violations.

18. *Drunkenness*.—Includes all offenses of drunkenness or intoxication.

19. *Disorderly conduct*.—Includes all charges of committing a breach of the peace.

20. *Vagrancy*.—Includes such offenses as vagabondage, begging, loitering, etc.

21. *Gambling*.—Includes offenses of promoting, permitting, or engaging in gambling.

22. *Driving while intoxicated*.—Includes driving or operating any motor vehicle while drunk or under the influence of liquor or narcotics.

23. *Violation of road and driving laws*.—Includes violations of regulations with respect to the proper handling of a motor vehicle to prevent accidents.

24. *Parking violations*.—Includes violations of parking ordinances.

25. *Other violations of traffic and motor vehicle laws*.—Includes violations of State laws and municipal ordinances with regard to traffic and motor vehicles not otherwise provided for in classes 22-24.

26. *All other offenses*.—Includes all violations of State or local laws for which no provision has been made above in classes 1-25.

27. *Suspicion*.—This classification includes all persons arrested as suspicious characters, but not in connection with any specific offense, who are released without formal charges being placed against them.
